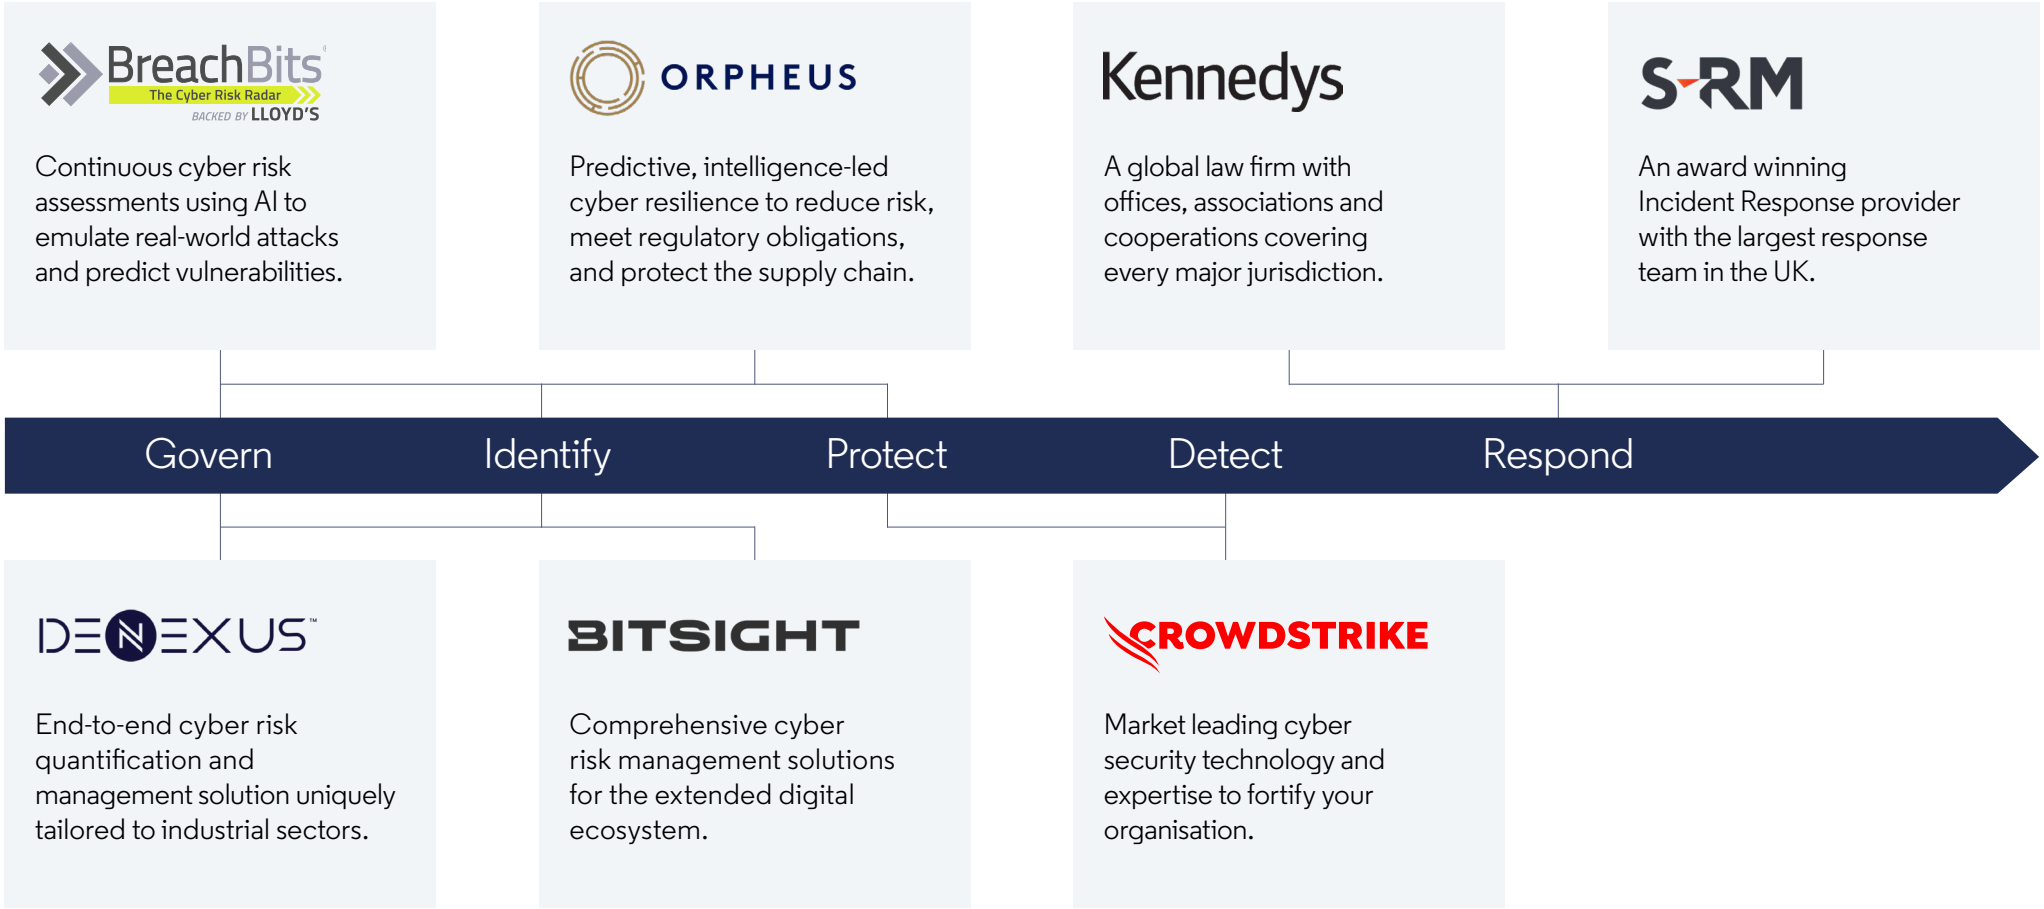
Chaucer Vanguard

Cyber Services

Contents

Introduction

Our Cyber team provides end-to-end support from business as usual to incident response and back again. We have established partnerships with the market leading vendors of today and tomorrow to offer our clients an unmatched selection of technologies and services. This enables our insureds to grow their cyber security programs and respond and recover effectively if the worst should happen.



BreachBits offers advanced AI cyber risk detection and management solutions designed to emulate real-world hacker tactics. Their automated capability detects, verifies, and tests 95% of pathways used by real hackers – moving your organisation beyond cyber hygiene and compliance into practical hacker relevance to drive better decision-making. In partnership with BreachBits, we offer a 25% discount for Chaucer clients.

BreachRisk™ for Business
Continuous cyber risk assessments using AI to emulate real-world attacks and predict vulnerabilities.

Attack Surface Monitoring
Continuous monitoring of your digital footprint or your 3rd parties to detect and mitigate potential attack vectors before they can be exploited.

Penetration Testing as a Service (PTaaS)
Regular and thorough penetration testing to uncover weaknesses and ensure robust defences.

Dark Web Intelligence
Monitoring of dark web activity to identify threats and compromised data – and testing compromised credentials.

Spearphishing Testing
Advanced techniques test your email systems and employees, safeguarding sensitive information.

BreachBits is backed by strategic investment from Lloyd's

Continuous Cyber Risk Analysis

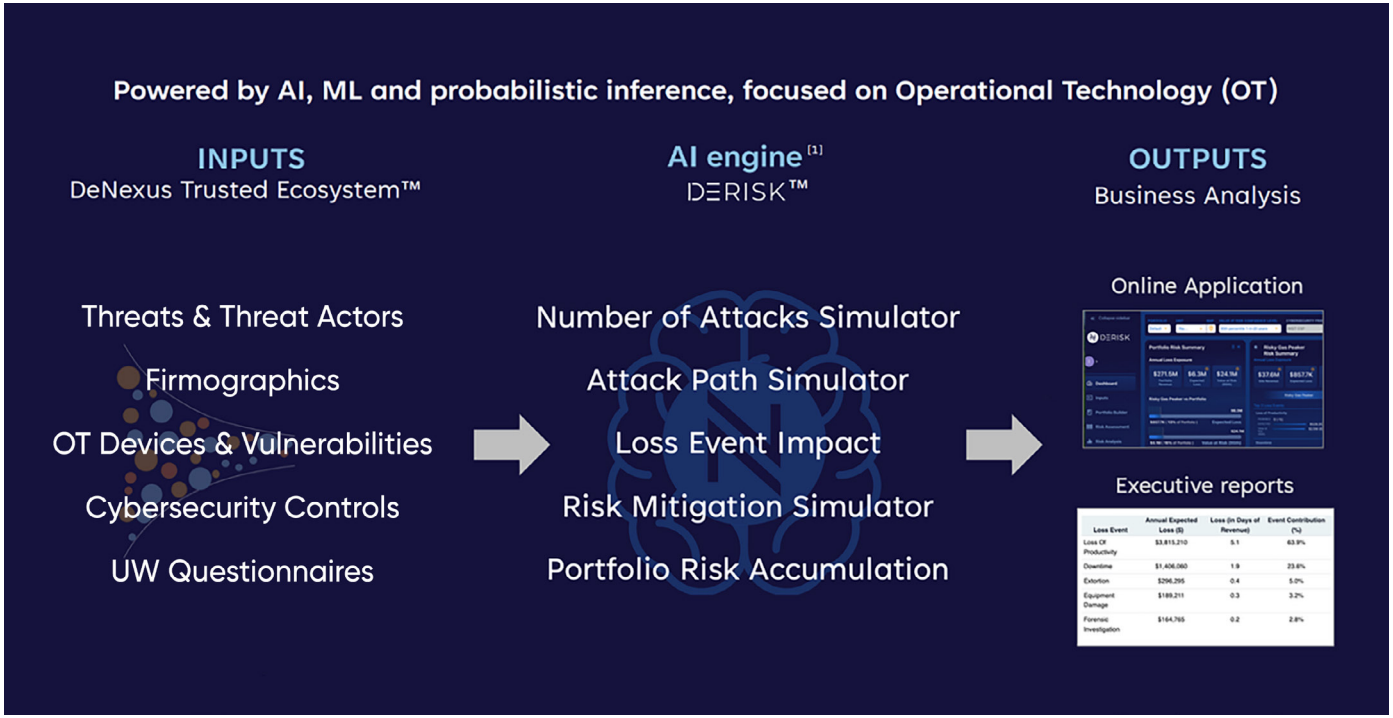
DeNexus delivers an end-to-end cyber risk quantification and management solution uniquely tailored to industrial sectors such as data centres, energy, manufacturing, transportation, and critical infrastructures with Operational Technology (OT) or Cyber-Physical Systems (CPS).

Cyber Risk Quantification
Understand the financial repercussions of cyber incidents and enhance cybersecurity strategies by translating complex risks into clear financial metrics.

Cyber Risk Data & Analytics
Enhance cyber risk analytics, revealing insights such as industry comparisons, trends in cyber threats and losses, and the effects of mitigation efforts.



"The combination of advanced risk management, precise risk quantification, and insightful data analytics makes DeNexus a valuable partner in safeguarding critical infrastructures and optimising cybersecurity strategies."

Kennedys

Kennedys is a global law firm with offices, associations and cooperations covering every major jurisdiction in Asia Pacific, EMEA, Latin America & the Caribbean, North America and the United Kingdom.

Kennedys award-winning Cyber Incident Response team is your first point of contact when you call the incident hotline, available 24/7/365.

In the event of a cyber incident, Kennedys design a strategy to help you manage and recover from the threat. The Cyber Incident Response team will connect you with any other support you may require including forensics, network restoration and communication, as well as providing key updates to Chaucer so we can manage your claim in the most efficient way.

A global, co-ordinated response

One cyber incident can cause spiralling issues across borders and geographies. As a global incident response team, Kennedys respond to global threats wherever your clients and customers are affected.

Recover quickly

Guiding you through operational, legal and regulatory response, Kennedys help get your operations back up and running, protecting your reputation and operational resilience.

Act fast

With an experienced, connected response team that helps minimise an incidents impact on your business and customers.

Getting stronger for tomorrow

With strong policies and procedures to ensure your business is well protected against future threats.

ORPHEUS

Orpheus delivers predictive, intelligence-led cyber resilience - helping organisations reduce risk, meet regulatory obligations, and protect their supply chain from cyber threats with clarity and confidence.

Supply Chain Cyber Risk Management

Secure your supply chain from cyber threats with confidence. Our threat-led cyber risk assessments help you understand, score, and continuously monitor supplier cyber risk across your third-party ecosystem - ensuring alignment with both regulatory and internal standards.

External Attack Surface Management

Achieve continuous visibility of your internet-facing assets - the foundation for proactive risk reduction and regulatory alignment. Our platform uncovers exposed infrastructure, misconfigurations, and emerging threats across your digital perimeter, enabling decisive action and compliance with frameworks such as DORA, NIS2, and ISO 27001.

Vulnerability Management

Focus on what matters. We prioritise cyber security vulnerabilities based on real-world exploitability, so you can target remediation where it counts, reduce risk faster, and optimise resource use.

Software Cyber Risk

Build resilience through software visibility. Identify software and firmware risk across your organisation. Orpheus enables proactive SBOM management and highlights emerging threats linked to your digital infrastructure.

BITSIGHT

Bitsight provides comprehensive cyber risk management solutions that help organisations identify, prioritise, and mitigate cyber risks across their extended digital ecosystem.

Exposure Management

— Gain a comprehensive view of your digital infrastructure, including shadow IT, to discover, assess, and remediate cyber risks effectively.

— Respond to changing threats with data-driven insights to set security program targets, benchmark performance over time, and prioritise mitigation efforts.

Governance & Reporting

— Benchmark your performance against industry peers and align stakeholders around a cyber security strategy to improve communication and decision-making.

Third-Party Risk Management

— Make informed, risk-based decisions about your vendors, continuously monitor for vulnerabilities, and take swift action to mitigate risks.

— Proactively identify and assess potential risks associated with third-party vendors' security postures.
